

Understand the Secret Language of Trees....

Capture energy, align your intent, and deliver a transformation through the wisdom inherent in wood.

Sounds fantastic, but primal people the world over venerate trees as a living symbol of their dreams and aspirations and, of Life itself. For not only in its abundant generosity towards humanity, but also in its universal symbolism of metaphysical principles, every tree is an offshoot of the "World Tree", (the Ygdrasill in Norse mythology) that grows the world over, in every climate under the all seeing Sun.

Modern society values the tree for little more than its market value, but our primal ancestors also knew a great deal about the world they lived in, and applied that knowledge accordingly. If some of those ancient applications should again come to light, would it not be of value? If you could capture a piece of your primal past, focus the secret wisdom, knowledge, and power inherent in a simple piece of wood, would you?

[Apple](#) is the symbol of beauty, innocence and youth. It is the tree of regeneration and eternal life. The apple's most common use is in love spells. The blossoms can be used in sachets, potions, incenses and candles. The apple is one of the foods of the dead, and might be offered to the dead on Samhain. Magick wands that have strong connections with the emotions and love can be made from apple wood.

[Ash](#) is known as the tree of strength of purpose, and wisdom. It represents the Ygdrasill, the Norse Tree of Life and the Universe. It is a tree ally that can be used for prophesy and visions. Ash sometimes represents the power which resides in water. To ward off evil, hang a staff carved of ash over your doorpost. Healing wands and brooms can be made from the wood, and poppets can be carved from the roots. Place ash leaves beneath your pillow to induce psychic dreams. Ash leaves can also be carried for general good fortune.

[Lignum Vitae](#) is an exceptionally powerful magical wood. It has strong protective and healing properties and is a very powerful wood. It is the "Wood of Life" and is the heaviest and densest wood in the world. An evergreen tree, indigenous to the West Indies, it has a twisted trunk, opposite oval compound leaves and blue flowers. It is the national tree of Jamaica. The wood is one of the hardest; has several fats and resins that makes it self lubricating and almost impervious to water.

The acrid-tasting, brownish resin contained in the heartwood has both medicinal and no medicinal applications. One highly dramatic non-medicinal use is, combined with an alcohol solution, the resin turns blue when it comes into contact with bloodstains. Thus, it has served the police in finding bloodstains that might go undetected. In recent times, scientists have found that two of the resin's most active ingredients, guaiaretic and guaiaconic acids, are effective anti-inflammatory agents, local stimulants, and laxatives. Because of the anti-inflammatory property, the substances are used in pharmaceutical preparations for sore throats and for inflammatory diseases such as rheumatoid arthritis and gout.

[Maple](#) is known as the tree of enchantment. It is famous for its unique properties and is used to generate abundance, and imaginative energy. This wand is a companion wood for a person full of imagination and originality, who hungers for excitement and new experiences.
